

## What is Nadi Dosha ,Nadi Dosha Remedy and Solution

It is strongly believed that even if the matching points or the Guna Milan score is high, one should not marry in the same Nadi. This will seriously affect married life and family happiness. The importance of Nadi dosha can be derived from the fact that it has the maximum score in Ashtkoot Guna milan. It is important because it brings severe health issues and danger to the couple and also the progeny or the child.

What is Nadi Dosha in Horoscope Matching?

There are 28 matching points if we subtract 8 points which are prescribed for Nadi. Incidentally, when there is zero in front of Nadi it is considered a dosha. However, the point that I'm making is that in spite of the high score we see that is 28 out of 36 total points, marriage is not recommended since there is a Nadi Dosha.

There is another very important reason because of which marriage between the same Nakshatras is not recommended. Such people are likely to have the same planetary period. This is very important to note as the Dasha period is considered from the birth Nakshatra. Therefore if the planets are well placed both will have good time, but if they are ill-placed then both will have bad time simultaneously. Good or Bad effects will thus get multiplied. Good effects are welcome though, but the ill effects may become difficult to bear.

As a Vedic astrologer with past experience of more than 20 years in Horoscope reading, especially relationships and horoscope matching, please note that high matching points in [nadi dosha cancellation](#) Guna Milan are never a guarantee to happy married life. The most important is the placements of the planets in the natives horoscopes. If the 7th house (which is the house of marriage) and the lord is strong and the karka which is Venus in a male chart and Jupiter in a female chart is strong and well placed, the native will be bestowed with marital happiness. Therefore I always insist that a Grah Milan which is matching of the planets is more important than Guna Milan and remedies for any dosha in Kundli Milan like Nadi Dosha, Mangal Dosha, Bhakoot Dosha should be done before solemnizing the marriage. It is very important to check if Nadi dosha gets cancel. If the dosha gets cancel, then no remedy / Parihar is required.

The 27 Nakshatra is divided into three categories called Nadis. The three Nadies are:

1. Adya - It means beginning, Ashwini is the first amongst Adya Nadi Nakshatras.
2. Madhya - It means middle, Bharani is the first among Madhya Nadi Nakshatras.
3. Antya - It means the end. Kritika is the first amongst the Antya Nadi Nakshatras.

Is Nadi Dosha applicable only to Brahmins:

This is another absurd thing that you get to hear from people that Nadi dosha is only applicable to Brahmins. As per the Caste system in India, the Brahmins held the top position in society, because at that time there were no universities, education systems like today, their contribution to the society was enormous. At that time there were only Gurukuls, ashrams and Brahmins were responsible for spreading Vedic knowledge and wisdom in the society, besides carrying religious activities. Therefore Brahmins were strictly restricted from marrying in case of Nadi dosha, because as caretaker of education, knowledge and holding the principles of .Dharma. in the society. If they don't have children then that knowledge and wisdom will not be passed to future generations. Therefore Brahmins were not allowed to marry in case of Nadi dosha. However Nadi dosha certainly affects everyone irrespective of Caste, Creed, Race or religion.
